BLACKLISTEN

Blacklisten er en kilometerlang alfabetisk liste med en blandet landhandel af kemikalier, konserverings-midler, silikonestoffer, kemiske solfiltre, formaldehyd-frigørere og dokumenterede allergene parfumestoffer.

De hører til i en klub, som du og din familie ikke har lyst til at være medlemmer af - tro mig. Stofferne på Blacklisten er hormon-forstyrrende, allergifremkaldende, sundhedsskadelige og/eller miljøbelastende.

Brug Blacklisten til at lege den lille kemiker, når du shopper. Tjek især kosmetik og hudplejeprodukter.

A

Acrylamide

Alkanes, C10-13, chloro (Short Chain Chlorinated Paraffins)
